ATHENÁ

# ATHENÁ

Sophisticated design of high-aesthetics  
that suits any space

The new Sevensun's pergola  
combines the best elements  
of a pergola and an  
awning system.

Durable and versatile, the Athena pergola can be combined with other systems such as the EOS Zip system, multiplying the possible combinations and adaptability of these systems to any environment.

Uniquely combining high quality with aesthetics, this is the ultimate high-end proposition.

The ATHENÁ pergola is the best choice when maximum space coverage, durability, functionality and safety are required.

Ideal for use in outdoor and semi-outdoor residential areas, hotel facilities and dining areas.

## Unique Usability & Efficiency

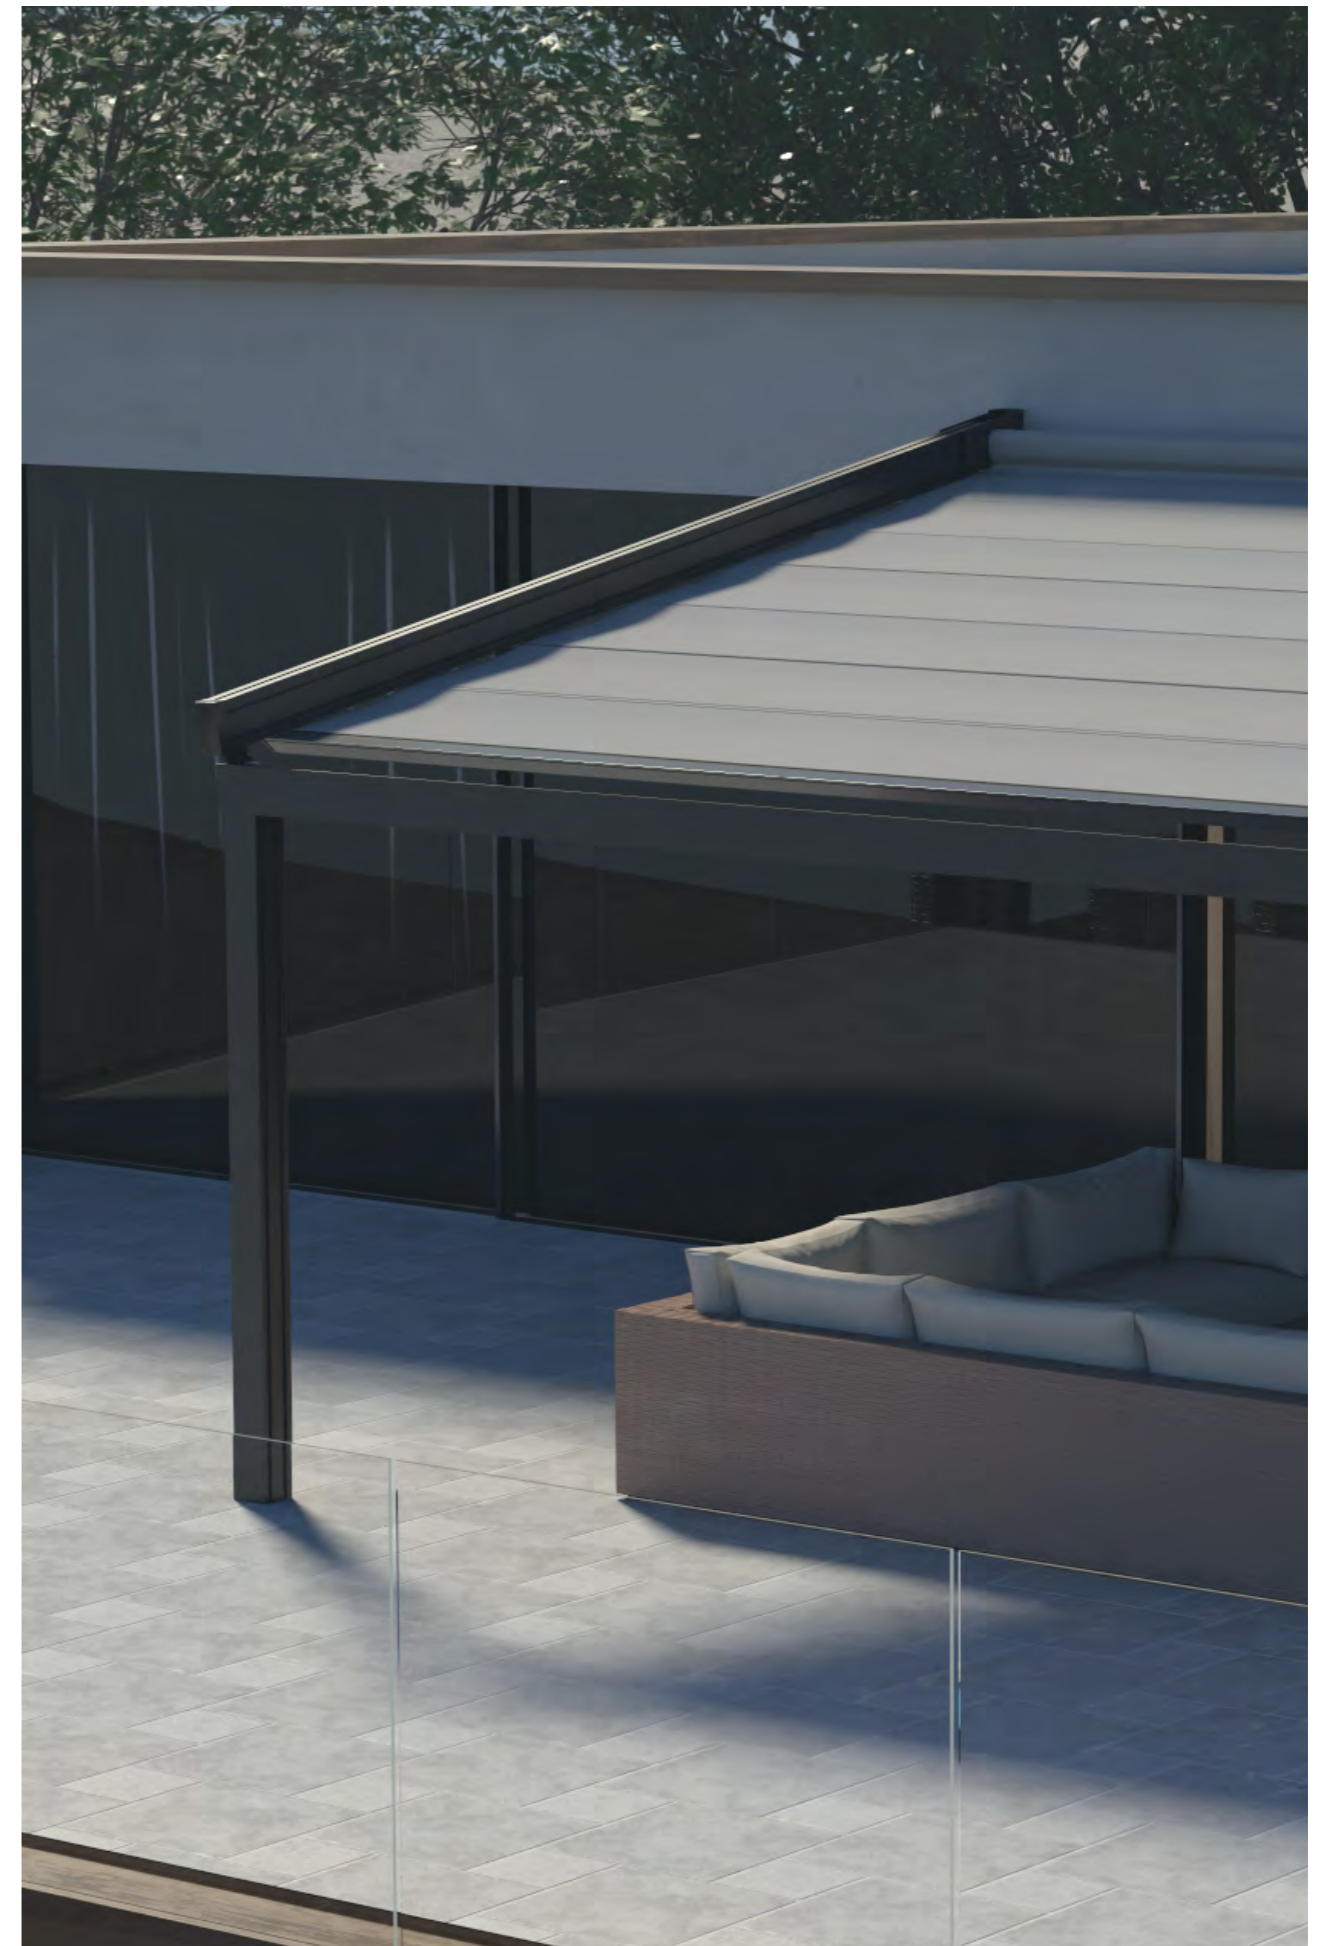

Exceptional simplicity in installation with easy support on structural columns without affecting the architecture of the space.

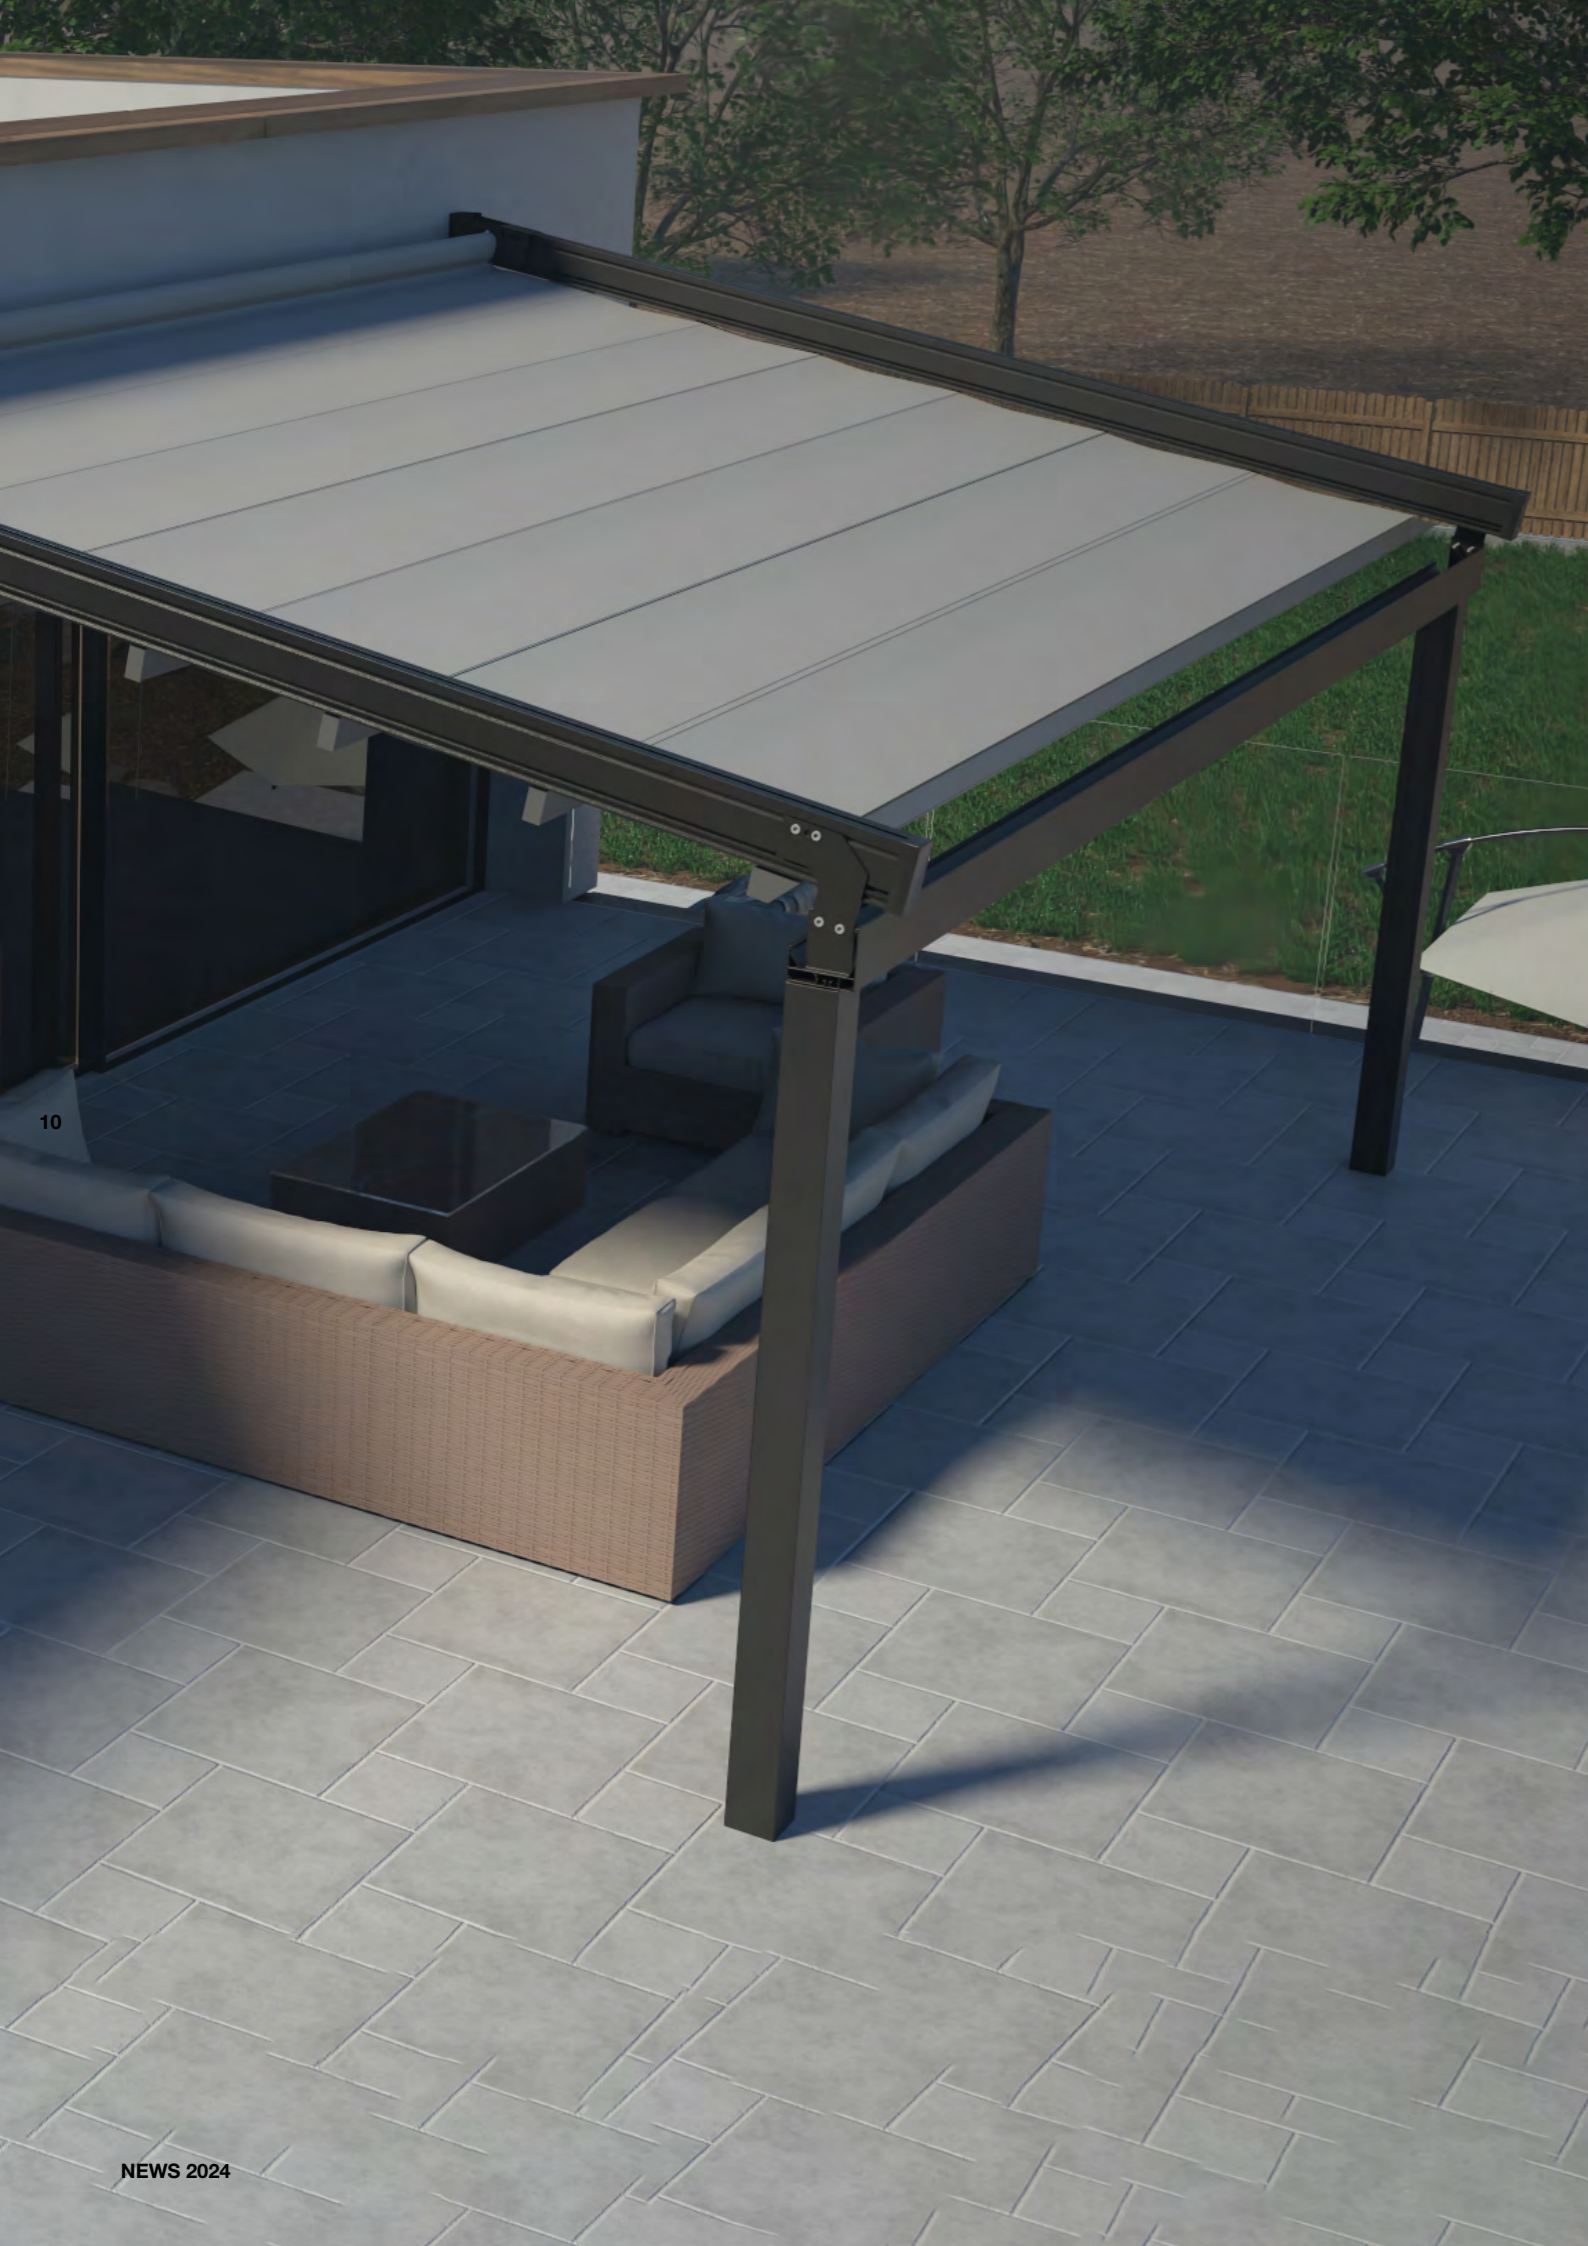

It is not affected by weather conditions, thus eliminating the need for maintenance.

Detailed design that ensures the removal of water under difficult weather conditions.

Protection from solar radiation, provision of continuous ventilation in the covered area and energy saving.

To reduce our environmental impact, we have reduced the number of parts by reusing the same ground connector, for the gutter profile and for the crossbar, if selected.

# ATHENÀ

MAX 1600 X 700 CM

## Characteristics

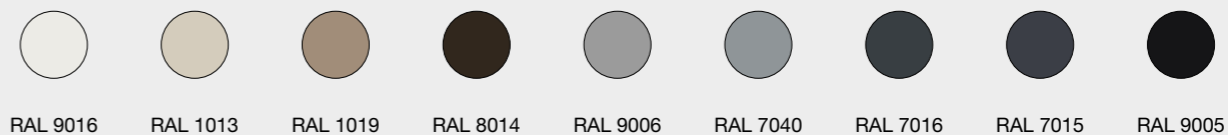

- High-level aesthetics
- Minimal design with simple, straight lines
- Automatic opening & closing of the fabric
- LED lighting in moving & fixed parts
- Capacity of cooperation with other systems
- Variety of colors in metallic parts & fabrics
- Integrated water drainage design
- Excellent resistance to the elements of nature

## Dimensions

- 16-meters wide with 5 pillars, 4 meters wide from pillar to pillar
- Maximum projection of 7 meters (up to the pillar)
- Column height up to 3 meters
- Angle at inclined position of 10-15 degrees (adjustable)

## Finishing color

The RAL shades of the Ammos (super durable) collection are certified with the Qualicoat international quality mark (Class 2). All the colors in the collection are ultra-resistant and have at least three times more resistance to outdoor conditions than simple durability colors

Available in all RAL colors on request.

\*Other available finishes also include anodized, satin, matte RAL, metallic RAL, glossy RAL, super-durable grain, grain RAL, wood-like, and super durable Sahara Cosmos.

# EOS

The innovative vertical blind system

Minimalist, elegant  
and modern design  
creating an incomparable  
aesthetic effect.

## Experience the next level of indoor comfort

Enhance your surroundings with the sevensuns' innovative **EOS** zip system, seamlessly combining efficiency and aesthetics in a contemporary design.

Create the perfect space for work, entertainment, and relaxation seamlessly, just as you envisioned, with the simplicity of a single movement.

With the **EOS** zip, users can choose from a variety of transmission components, ensuring a combination of flexibility, functionality, and high performance.

## High performance in timeless design

The Sevensun **EOS** zip vertical blind system offers a harmonious blend of efficiency, aesthetic charm, and modern design, promising to transform your living environment into a sanctuary for work and leisure.

The upper box flaunts a minimalist, elegant and modern design that delivers a distinctive aesthetic impact. The angular details break the monotony of 'Flat' cutouts, giving your **EOS** zip a unique character.

The innovative side guide with an impressive yet elegant size of 5x5 cm. It is equipped to handle any weather challenge with confidence. This is made possible by high-strength, high-performance shock-absorbing components seamlessly integrated into the zip fabric, complemented by a specially designed wide range of motion.

Precise support guidance in every direction ensures a seamless installation of the **EOS** zip guide, making it surprisingly simple and quick.

## Fabric innovation

Our innovative fabric production technology provides exceptional resistance to the elements, including unpredictable winds, temperature fluctuations, and changes in humidity levels.

As the strong rays of the summer sun penetrate your interior space, the **EOS** zip system acts as both a shield and a symbol of sophisticated design, creating an atmosphere of cool serenity. During the cold winter months, it takes on the role of a timeless exterior design element while protecting you from unwanted drafts.

Changing the **EOS** zip fabric is now a breeze, taking only 9 seconds. The advanced elastic component on the upper edge of the fabric allows for immediate replacement without additional steps.

## Characteristics

- Minimalist, elegant and modern aesthetics
- Durability in the most demanding wind conditions
- Ergonomic design for comfortable and quick installation
- Optimal reduction of solar penetration
- Protection from insects and adverse outdoor elements
- Motorised
- Solar powered operation (optional)
- Quick fabric replacement in 9 seconds
